Tiger Cube – 3D Paper Model

Cut, fold and glue to make a tiger cube that stands on your desk!

Cut Fold back Glue

1 **Cut** along the dashed line, all the way round – ears and glue tabs too.

2 **Fold back** on every dotted line, so the tiger stays on the outside.

3 Put glue on the **side tabs** and stick them inside the bottom and the back.

4 Glue the last **3 tabs** and press the lid shut. Your tiger is ready!

Tip: Thick paper (100–120 gsm) makes a stronger cube. Hold each tab for a few seconds.

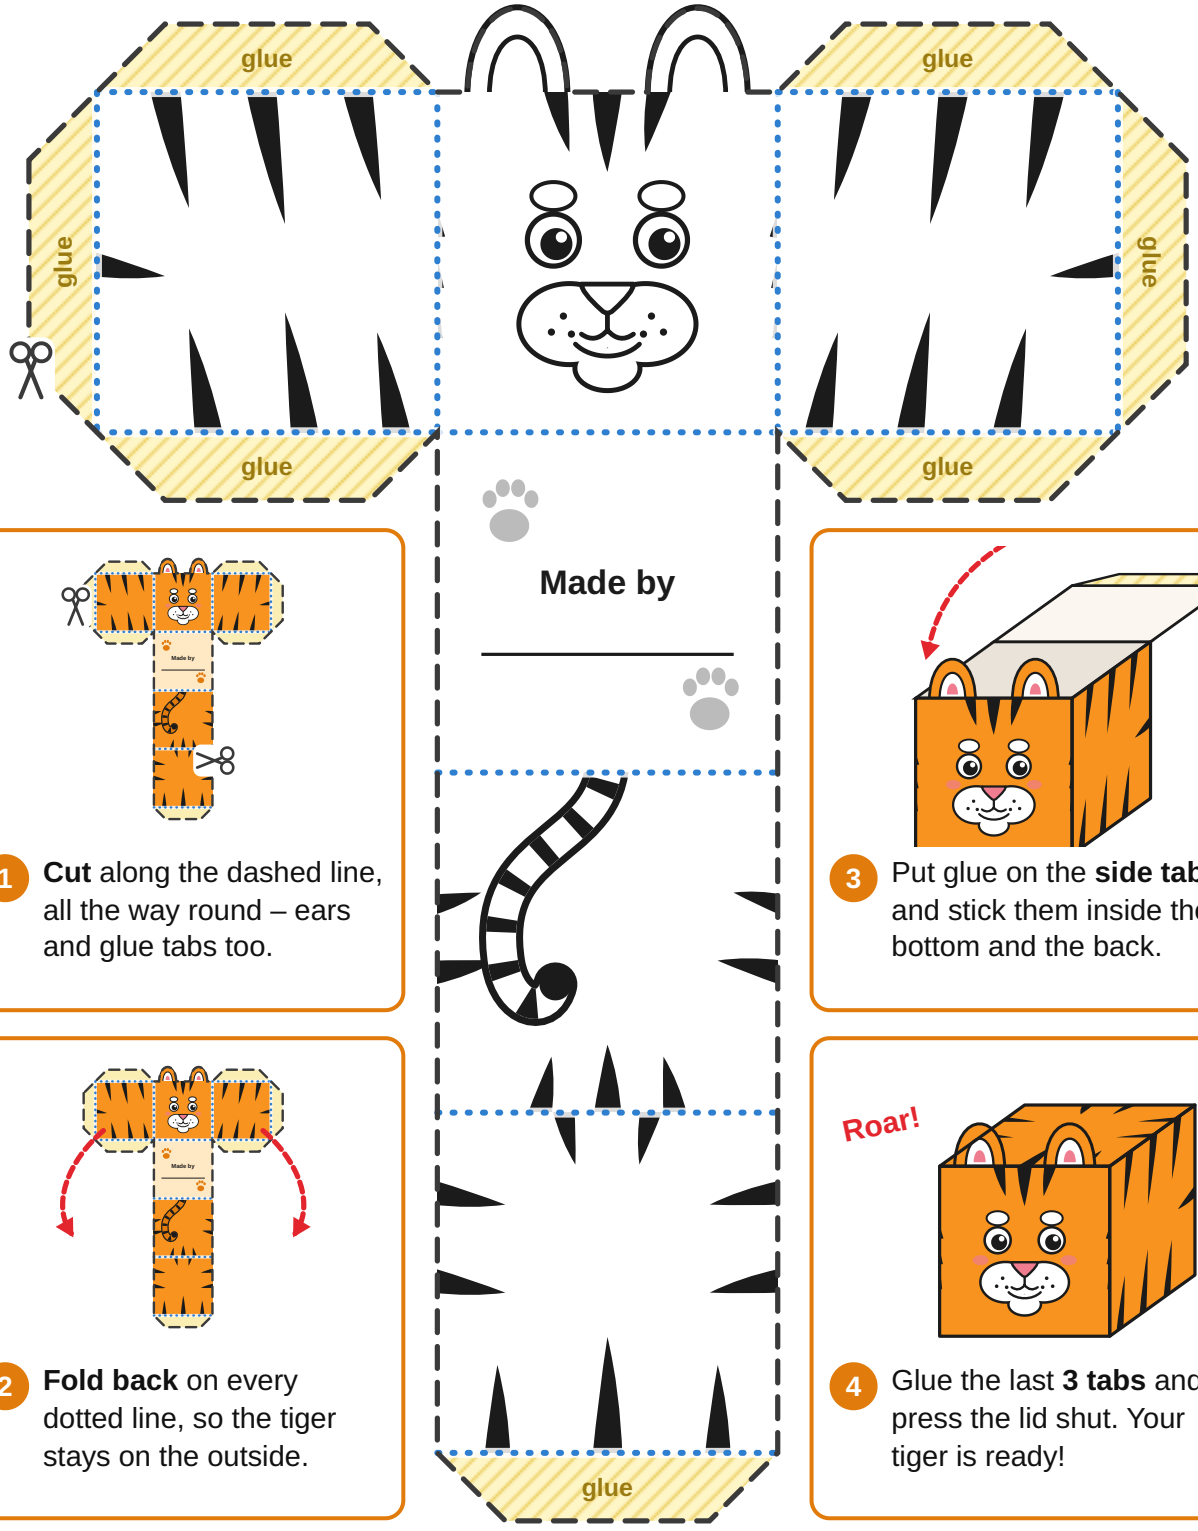

Age : 6–10 **Art & Craft**

Colour Your Own Tiger Cube

Colour your tiger in your own colours, then cut, fold and glue it into a cube.

Cut Fold back Glue

1 **Cut** along the dashed line, all the way round – ears and glue tabs too.

2 **Fold back** on every dotted line, so the tiger stays on the outside.

3 Put glue on the **side tabs** and stick them inside the bottom and the back.

4 Glue the last **3 tabs** and press the lid shut. Your tiger is ready!

Tip: Thick paper (100–120 gsm) makes a stronger cube. Hold each tab for a few seconds.
